- Incorporated feedback to improve **UI/UX** and website performance
- Optimized metadata and page structure for better site efficiency of NextJS webpage (SEO metrics **increased from 60% to 96%**)
- Tech stack: ReactJS, NextJS, Ant Design, Shadcn, TanStack, SignalR, Axios, Tailwind, Redux, SCSS, i18n

PROJECTS

Love Alarm

Full-stack developer, Backend leader

Jan 2026 - Mar 2026

- About: A mobile app which detects nearby users, which allows users to send love requests to others in order to start a conversation and step into Couple mode for in-love people.
- Use Bluetooth Low Energy to detect nearby users
- Use SocketIO to implement real-time messaging and Firebase for real-time app notification
- Assign tasks to members; track progress and merge code weekly; host weekly report
- Tech used: React Native, Axios, ExpressJS, Mongo, SocketIO, Firebase

Warehouse Management System

Full-stack developer, Team leader

May 2025 - Present

- About: Website where Salesmen manage orders, Delivery Staff update shipments, Warehouse Keepers track inventory, and System Admin oversees user accounts to streamline steel trading operations
- Use SocketIO to implement real-time notification
- Use ExpressJS and ReactJS to perform core features for mentioned actors
- Assign tasks to members; track progress and merge code weekly; host weekly report
- Tech used: ReactJS, React router, Tailwind, Axios, ExpressJS, Supabase, SocketIO

EDUCATION

FPT University - Software Engineering

2023 - Present

- GPA: 8.4/10
- Achieve Excellent Student in Fall 2024

CERTIFICATES (Coursera)

- User Experience Research and Design
- Software development lifecycle specialization
- Web Design for Everyone

EXTRA ACTIVITIES

Japanese Software Engineers Club

Expertise department

- Participate in developing SDK for J-Surviv platform for CodeFest2025
