

SY THI QUYNH NGÀ

Other name: Lily | (+84) 833 803 102 | houselily010@gmail.com | Hanoi, Vietnam

Portfolio: [LilyHouse](#) | Github: [Lilyhouser](#) | Facebook: [nga.sy.9822](#)

SKILLS

- Programming languages: JavaScript, TypeScript, Java
- Frameworks & Libraries: ReactJS, NextJS, ExpressJS, Mongoose, Socket.IO, Axios, Redux, Zustand
- Databases: SQL Server, MongoDB, Supabase
- Languages: Vietnamese (native), English (IELTS 6.5 – 2023)
- Tools: Git/Github/Gitlab, Postman, Docker

EXPERIENCE

H2Q Solution

Frontend Developer (Intern)

Aug 2025 - Nov 2025

- Developed and optimized web pages using NextJS and ReactJS, working with backend, testers, and BAs.
- Incorporated feedback to improve **UI/UX** and website performance.
- Optimized metadata and page structure for better site efficiency of NextJS webpage.

PROJECTS

Warehouse Management System

Full-stack developer, Team leader

May 2025 - Present

- About: A website empowers Salesmen to manage orders and deliveries, while Delivery Staff update shipment details. Warehouse Keepers tracks inventory and goods movement, with a System Admin overseeing all user accounts to streamline steel trading operations.
- Use SocketIO to implement real-time notification
- Use ExpressJS to perform APIs for Salesman, Delivery Staff, and Warehouse Keepers' workflows
- Use ReactJS to build frontend for delivery manager
- Assign tasks to members; track progress and merge code weekly; host weekly report; train members to get used to ReactJS and ExpressJS
- Tech used: ReactJS, React router, Tailwind, Axios, ExpressJS, Supabase, SocketIO

SoulSync

Backend leader

Feb 2025 - Mar 2025

- About: A soulmate-finding website that matches users via an algorithm considering zodiac, hobbies, and location. Matched pairs can then chat incognito and exchange hearts.
- Use SocketIO to implement real-time chat for matched pairs
- Assign tasks to members, track progress and merge code weekly, train ExpressJS to newbies
- Tech used: ExpressJS, MongoDB, Mongoose, SocketIO

EDUCATION

FPT University - Software Engineering

2023 - Present

- GPA: 8.59/10
- Achieve Excellent Student in Fall 2024

CERTIFICATES (Coursera)

- User Experience Research and Design
- Software development lifecycle specialization
- Web Design for Everyone

EXTRA ACTIVITIES

Japanese Software Engineers Club

Expertise department

- Participate in developing SDK for J-Surviv platform for CodeFest2025
